

SBMG

Small business messaging gateway

Your gateway to smart messaging

Like most sole traders and micro-businesses, you cost-effectively use P2P SMS and WhatsApp messaging tools. What you need is an App that transforms your phone to give you the power of Enterprise grade messaging tools at a fraction of the cost and complexity.

No additional cost per message

Convenience & simplicity

Powerful API integrations

PROCESS

How it works?

We aim to simplify the timeline from go to live.

1

Login or Sign Up

Jump in to our web portal and docs to get underway.

2

Download SBMG on Android

Bring your own sim and setup a personal sms gateway on your own device for integrations to send messages.

3

Connect and Integrate

Use one of our options to send via the web, integrations like Zapier, or build custom integration with our API.

4

Ready to Use!

You or your integrations request a message, we handle the rest. Messages are sent and receive on your local device.

WHY CHOOSE US

SBMG has a fresh take on messaging solutions

We are 100% focused on value return. Skip the costly thrills and get down to business. We are a software first service provider to empower the messaging capabilities every business needs in their pocket.

No Hassle Dedicated Number

Skip the lengthy applications and provisioning processes. Go live is measured in minutes not months.

Integration Ready (Developer Or Not)

Let's automate messaging processes and build smart solutions to use our messages in business and save the human time to solve challenges and maximise impact. Use our API or Zapier integration to build tailored solutions for your use case.

We really know messaging

With over 20 years of messaging industry experience in a mix of perspectives we've been here from the beginning. Jungle Drum is launching the next wave of innovation of business sms.

SBMG

Small business messaging gateway

Send enquiries to info@sbmg.co.xx
or visit us at www.sbmg.co.nz.

SBMG is a small business messaging gateway service. Enable your business to use a regular Android mobile phone to get sending with one dedicated number without inconvenience and complication of cost per message, regional applications and provisioning.

How It Works

Simply bring your own sim plan, install our Android app on your device, and you are ready to send. We provide the connection between our web portal, integrations and api to provide a limitless number of options to send SMS as your business needs.

Quick start

Check our guide to send your first SMS including Android set up.

Integrations

Connect to thousands of other apps as triggers with connectors for the most popular workflow platforms.

API

After a custom solution or deep integration to your own tools and services, use our api for full flexibility.

FAQ

Looking for quick answers to general questions, our FAQs might have the answers you're after.

Integration Introduction

Easily get setup and sending with integrations with popular platforms.

Find your connector

Connect to thousands of other apps as triggers with connectors for the most popular workflow platforms.

Get streamlined and automated

READY TO SEND

Choose Your Package!

Base

\$35/Month

- 250kb/mth outbound data¹ store (approx. 2,000 message fragment capacity²)
- 30 days of reporting data retention
- 5 contacts per send request

Boost

\$55/Month

- 500kb/mth outbound data¹ store (approx. 3,500 message fragment capacity²)
- 90 days of reporting data retention
- 10 contacts per send request

Pro

\$75/Month

- 750kb/mth outbound data¹ store (approx. 5,000 message fragment capacity²)
- 180 days of reporting data retention
- 15 contacts per send request

¹ Outbound data is the user retrievable information of the message event retrievable through SBMG API (content, user/integration defined metadata, message event metadata).

² Message/fragment count is a minimum indication if character count per message is maximum for every message up to max monthly data use.
